**Nursing animals should be provided milk or a milk replacer and not Emeraid. Values are for weaned juveniles.

The Lafeber's Emeraid Nutritional Care System is the first complete elemental diet series designed for critically ill carnivorous, herbivorous and omnivorous exotic animal species.

How To Use The Lafeber's Emeraid Nutritional Care System

- Due to the unique dietary needs of many exotic animal species, some of the Emeraid products may need to be mixed together.
- The Emeraid Exotic Carnivore, Herbivore and Omnivore-Avian diets are designed to be used as single products or mixed together in the Lafeber Blender Bottle (larger volumes) or a small cup (smaller volumes).
- Follow the same general mixing directions listed on the individual product labels.
- When reviewing the dosing chart on this page, the 'Scoops of Emeraid Mixed' is based on using the large red scoop with 60 mls or the small red scoop with 20 mls of warm water (103-110°F).
- As long as the correct proportions described above are used, the different products will be mixed in the correct percentages recommended for each respective animal species.

Emeraid Omnivore-Avian

Protein	20%
Fat	9.5%
Fiber	2.5%
Energy	4.06 Kcal/gm

Emeraid Exotic Carnivore

Protein	37.8%
Fat	34%
Fiber	4.5%
Energy	5.14 Kcal/gm

Emeraid Herbivore

Protein	19%
Fat	9.5%
Fiber	32%
Energy	2.95 Kcal/gm
