Egg Necropsy Report

Clinician:
Date of Death: Time of Death
Date of Necropsy: Patient name:
Owner: Species: Age:
Lay Date: Set Date: Expected Hatch Date:

Parent incubated □ Artificially incubated □

Date pulled for artificial incubation:
Incubator temperature: Incubator humidity:
% egg wt loss during incubation Expected % wt loss
Was embryo broken out prior to necropsy? If so, egg weight Detailed observation
Dam Sire
Previous reproductive success/failure of this pair:

Additional history (candling notes, developmental progress, status of clutch mates, etc.):

Egg weight: Egg length: Egg diameter:
Egg shell quality:
Membrane integrity:
Embryo position:
Stage of development:
Edema: Y □ N □
Hemorrhage: Y □ N □
Deformities: Y □ N □
Degree of yolk sac retraction:
Additional findings:

Yolk cytology □ Yolk culture □

Egg Shell saved □ Albumen culture □
